

REX CONNER

Staging and Production Requests

For Rex's presentation to have the maximum impact, we ask that you coordinate with the venue and production team to provide the following items. If your event cannot accommodate these requests, please let us know.

Rex has the experience and options to adjust accordingly.

1. Please provide a riser (stage) measuring 12 feet deep by 32 feet wide, preferably set on the longer side of a rectangular room. The riser ensures safety and visibility for Rex's entrance and other demonstrations.
2. Wireless lavalier microphone.
3. Music playback capability. Rex will bring one or two audio files via downloadable link and/or portable drive, and he will ask your technician to play them on his verbal cue(s).
4. Hollow lectern, suitable for the storage of Rex's props.
5. Rex may need to trigger a blackout (all lights completely out) at one point during his presentation, upon his verbal cue.
6. We ask that the first row of chairs be no more than ten feet from the stage. This enables better interaction and energy exchange with the audience.
7. In certain presentations, Rex may wish to include video or slides. He can do this from his laptop or provide the files for your technician.
8. Rex would appreciate a twenty-minute sound check with your production crew to test his microphone and step through a "cue to cue" of his presentation. This is best achieved at a time when there are no audience members in the room.

Please contact our office at (916) 749-5200 regarding any questions, concerns, or deviations. Rex looks forward to working with you and your team to deliver an outstanding presentation!
